

e-learning

Introduction

Despite of several earlier attempts it is only in 1890 that a Medical Faculty was founded in Lausanne. The actual Medical Center called Centre Hospitalier Universitaire Vaudois (CHUV) was inaugurated in 1982. Currently the curriculum undergoes a pedagogical redesign. Beside a reinforcement of PBL teaching, the teaching of clinical skills will be extended.

Curriculum model

1st year (300-400 students)

• 5 modules containing basic and human sciences in a multi disciplinary and system-oriented approach

2nd year (100-150 students)

• 8 modules: Cells - organs - systems, Cardiovascular and Respiratory module, Kidney and Homeostasis, Digestion and Metabolism, Blood Immunity – Infection, Neurosciences – Reproduction, Community health, Clinical skills. Methods: lectures, PBL, e-Learning (Embryology, Histology, Immunology, Physiopathology, Clinical skills)

3rd year (120 students)

• Clinical sciences. Methods: lectures, group bedside teaching, PBL, E-learning (Physiopathology, Pathology)

4th year (120 students)

• Clinical sciences. Clinical reasoning. Group and individual bedside teaching. Integrated theoretical and practical learning.

5th year (120 students)

• Elective clinical clerkship activities.

6th year (120 students)

• Clinical sciences and final exam (8 months of examination)

Facts & Figures

University

10'206 (55% women) students,

Medicine

930 undergraduate students

(59% women)

9% foreigners

Hospitals

900 beds

(Medical center without peripheral hospitals)

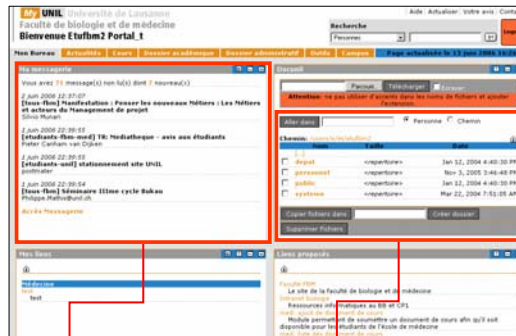

Technological infrastructure

- 2 laptop working spaces
- 23 computers dedicated to students @ library
- Special student's discount agreements (Mac/PC) for soft & hardware
- PrintUnil : Network printing system with payment account
- All student's area covered with WiFi
- AAI authentication : federated identity management
- Personal disk space on server accessible via portal
- MyUnil : personalized student's portal including access to mail, administrative records, schedules, marks, course documents, ...

Manpower

- Helpdesk
- "Pedagogical engineers"
